

In order to deliver a timetable within school, we have to group subjects into 'Pools'. Pools have been carefully designed to consider combinations of subjects which work well together, based on our experience of what students like to take as subject combinations and what is expected by employers and universities Post-18. Students cannot select more than one subject from any one pool, for example, Maths and English Language cannot be selected together as they are both in Pool 1, however, you could select Maths (Pool 1) and Chemistry (Pool 2), OR you could select BTEC Health and Social Care (Pool 1/2) and BTEC Business (Pool 3/4), but you couldn't select BTEC Health and Social Care and BTEC Sport as they are both in Pool 1/2.
