Re: Consultation on the installation of a SEN Resource Base at Biddulph High School

This consultation invites you to comment on **the addition of a modular building which will be used to provide more effective support for young people in the Staffordshire Moorlands with SEMH.**

A new modular building will be required on the school's site to support Staffordshire County Council's SEND Vision "Right Time, Right Place, Right Location". Pupils will be accessing the resource on a 6-week block placement with a high quality transition and reintegration programme to support their existing mainstream provision.

All capital costs associated with installing the new provision will be funded by the Local Authority. Working closely with the Local Authority, we have ensured that the disruption to the school and local community will be extremely limited. The modular building will be located to the north end of the school grounds on a small area with a separate entrance. It will not be visible from the front entrance. As a modular building it will be erected off site and will be delivered fully built with little disruption to the normal school operations. A feasibility process has been undertaken, the proposed unit will be 46.3m² and will house no more than 10 students at any time.

The school values highly the views and opinions of the community within which it operates. We now seek your views regarding the Resource Base at Biddulph High School.

The consultation will run from 4th May to 1st June 2021. If you wish to comment on the proposed changes, please write to the school at:

Consultation Regarding the installation of a SEN Resource Base at Biddulph High School

Biddulph High School
