Post-16 Options

How does it all work?

Miss K Goodwin – Enterprise and Employability Leader

Post-16 Education - what are my options?

Since 2013, the Raising of the Participation Age law has stated that young people must be in some form of 'education or training' until they are 18. This can include:

Full time study: This could be a qualification taken at a sixth form, college or training provider, totalling 540 hours of learning time per year, or around 18 hours per week.

Apprenticeships: This involves working for an employer while studying for a qualification as part of your training. Usually work makes up 80% of an apprenticeship and at least 20% (or one day a week) should be dedicated to studying.

Traineeships: This is an option for students who would like to do an apprenticeship but may not have the experience, skills or qualifications to do so yet. Traineeships can last up to six months and involve a work placement, Maths and English qualifications and support with finding an apprenticeship.

T-Levels: This option is new for Sept 2020 and focuses on the digital industry in the first instance. Students will gain the equivalent of 3 A levels after completing the 2-year course. It is made up of a mixture of classroom learning (80%) and 'on the job' industry experience (20%) totalling at least 315 hours (approx. 45 days).

Part time study with Employment or volunteering: This could be working in a full time job (classed as any work that takes place over more than two months is over 20 hours per week) or volunteering (again, totalling 20 hours per week) while studying part time at a college or training provider (totalling 280 hours of learning per year).

How do I pay for post-16 education and training?

Education and training in the UK is free for young people until they turn 19. In addition, there is a 16-19 Bursary fund to help students from low income families pay for things like transport, food and stationary, which can be accessed at any sixth form, college or training provider you attend after Year 11: <https://www.gov.uk/1619-bursary-fund>

Many organisations have their own financial support for students, so check first!

<https://www.gov.uk/know-when-you-can-leave-school>

Sixth form colleges

Sixth form colleges typically focus on A-Level (Advanced Level) qualifications, two-year courses that end in an overall examination and a grade from 1-9, with a similar structure to GCSEs but looking at the subject in a lot more depth. Students can study:

Traditional A-Levels: subjects like, **Biology, Chemistry, Physics, English Literature, English Language, Mathematics, Geography, History, Languages, Religious Studies, Music, Art.**

Alternative A-Levels: subjects like, **Photography, Law, Sociology, Psychology, Business Studies, Film Studies, Media Studies, Economics, Politics, Sports Science.**

BTEC L3 Diplomas: Some sixth form colleges offer BTEC qualifications that can be taken alongside A-Levels. These are usually made up of a number of separate modules and include practical assessments and coursework, as well as exams. Subjects can include: **Health and Social Care, Applied Science, Engineering, Travel and Tourism.**

Students studying A-Levels usually select between three or four subjects (dependent on their GCSE grades) that they want to study at sixth form. Sixth form colleges also offer something called the Extended Project Qualification (EPQ), an independent project that can provide students with UCAS points to put towards university.

Entry requirements: Most sixth form colleges usually look for students to have achieved 5 GCSEs at Grade 4 or above but make sure you do your research, as some courses, such as A-Level Maths, Physics, Biology and Chemistry, require students to achieve a Grade 6 at GCSE in order to demonstrate their deeper understanding of the subject.

Some local options:

Biddulph High Sixth Form - <https://biddulphhigh.co.uk/welcome-to-the-sixth-form/>

Stoke on Trent Sixth Form College - <https://www.stokesfc.ac.uk/>

Colleges and Training providers

Colleges and training providers usually offer BTECs or other vocational qualifications that focus on a specific area of study in a practical way, which can include:

Specific Vocational Colleges

Reaseheath College: Animal management and Agricultural courses, including foundation and Extended Diplomas <https://www.reaseheath.ac.uk/>

Army Foundation College, Harrogate: junior soldier training and other pathways
<https://www.army.mod.uk/who-we-are/our-schools-and-colleges/afc-harrogate/>

Achieve Training: specialise in the construction industry and apprenticeships
<https://www.achievetraining.org.uk/>

Equality training: Childcare, Hair and Beauty, Barbering, Health and Social care and Business Admin <http://equality.training/about/>

North Staffordshire Engineering Group Training Association: specialise in Engineering qualifications and apprenticeships <https://www.nsegta.co.uk/about-nseg/>

Nacro Training: Construction careers <https://www.nacro.org.uk/courses-and-training/>

Rebus Training: Electrical apprenticeships and courses <https://www.rebustraining.co.uk/>

General FE colleges offer everything from **Hair and Beauty, Childcare, construction to Business Management, Games Design, Automotive Engineering. Food Technology, Fashion Design, Performing Arts and Photography:**

Stoke College <https://www.stokecoll.ac.uk/>

Newcastle College <https://nscg.ac.uk/newcastle-campus>

Leek and Buxton College <https://www.blc.ac.uk/>

Macclesfield College <https://macclesfield.ac.uk/>

Entry requirements:

Entry Level/Level 1 can require anything from no qualifications up to 3 GCSEs (any grade).

Level 2 usually requires 3 GCSEs at Grade 3 or above.

Level 3 usually requires 5GCSEs at Grade 4 or above.

Apprenticeships and Traineeships

Apprenticeships involve working for an employer in a specific role whilst being trained to do the job by experienced staff, in a combination of on-the job and off-the job training at a college or training provider (this must be at least 20% of the apprenticeship). Apprenticeships must be at least one year long and all apprentices must be paid a minimum of £4.15 per hour (although some companies pay more!). Apprenticeships can be taken in a host of industry areas including: **Engineering, Graphic Design, Software Development, Hair and Beauty** and **Catering** (and can be started as soon as an individual is 16 and has left full time education, although you can apply before this).

Apprenticeships come in different levels:

- **Intermediate/Level 2** (equivalent to GCSE) usually requires Maths/English at GCSE.
- **Advanced /Level 3** (equivalent to A-Level) usually requires 5GCSEs at Grade 4+.
- **Higher/Level 4-5** (equivalent to Foundation Degree) usually require L3 or A-Levels.
- **Degree/Level 6-7** (equivalent to University Degree) usually requires 3 A-Levels or similar.

Traineeships are an opportunity for students aged 16-24 who don't have the relevant qualifications, experience or skills to start an apprenticeship but are interested in progressing on to one in the future. **Traineeships** involve a programme of up to six months of study, including a work placement, qualifications in Maths and English and support with finding a job or apprenticeship once the course is completed. Students are not paid for taking part but can apply for a 16-19 Bursary fund to help with costs.

Applying for post-16 – How does it work?

Students will start to make their applications for post-16 study in the Autumn term and the application process will continue throughout the academic year.

October: Sixth forms and colleges begin their open events to promote courses and opportunities. They also open their online application processes.

December to January: Closing dates for most sixth form college applications.

NOTE: Colleges do not have the same deadlines but early applications are still advisable!

March: Students begin to receive and accept/reject offers.

September: Application for that year closes.

Students can apply via sixth form or college websites using their APPLY tab.

NOTE: Apprenticeships and Traineeship applications run throughout the academic year and students must be 16 and have finished full time education before starting. Apprenticeships have a much more detailed application process than sixth forms or colleges and may require students to find their own placements if taken via colleges.

Entry requirements – what do I need to achieve?

The recent changes to the grading system are set out below. Look at the information to make sure you know what grades you may need to get at GCSE in order to progress on to your chosen destination after Year 11.

Key points:

- A **Grade 4** is a *standard pass*, while a **Grade 5** is a *strong pass*.
- Only around 2-3% of students will achieve a **Grade 9**, making it a little higher than the old **A***.
- Although the new grades don't exactly match the old grades, colleges will mostly view them as follows:
9-7 = A*-A 6 = B 4-5 = C 3-1 = D and below.
- Vocational qualifications like **BTECs** match up with GCSEs as follows:
L1 – GCSE Grades 1-3 (Pass-Distinction)
L2 – GCSE Grades 4-9 (Pass-Distinction).
- Most colleges, sixth forms and apprenticeships accept BTEC-type qualifications, as do 95% of universities, including Russell Group and Oxford!

| New grading structure | Current grading structure |
|-----------------------|---------------------------|
| 9 | A* |
| 8 | A* |
| 7 | A |
| 6 | B |
| 5 | B |
| 4 | C |
| 3 | D |
| 2 | E |
| 1 | F |
| 1 | G |
| U | U |

Qualification Levels Guide – GCSE to Degree Level

YourPathway

Your Choices

How do I make my final decision about post-16?

Making a decision about where to go after Year 11 can be tricky, particularly while you are busy revising for your exams, so it is important to consider the following factors that might help with your decision making:

Where can this option take me in the future? If you are thinking about a destination after your post-16 options, such as university or higher/degree apprenticeships, it is important to know whether the qualifications you are taking from 16-18 can help you to progress on to these pathways. Use websites like **UCAS** - <https://www.ucas.com/> or **which University** - <https://www.theuniguide.co.uk/> to find out whether the course you are considering after Year 11 will allow you to progress onto what you want to do afterwards. Speak with the sixth form, college or training providers you are applying to, to get further details. For example:

- **If you want to study Dentistry at university you will usually need to take A-Levels in Chemistry, Biology/Maths/Physics.**
- **Some universities do not accept BTEC L3 Extended Diplomas (although 95% do).**
- **Apprenticeships have varying entry requirements – some ask for 5 GCSEs at Grade 4 or above while others ask for 2-3 A-Levels.**

What will this option be like? Whatever you choose to do after Year 11, you will probably be doing it for at least a year, so it is important that you know what the learning environment will be like and whether the style of teaching is for you. You could:

- **Speak to the sixth form or college staff and students at one of the open days/evenings which take place throughout the year – dates for these can be found on their websites.**
- **Research more about the sixth form, college or apprenticeship provider online to find out about what you would study as part of your qualification, what support is offered while you study, e.g. help finding work experience, financial support like a free bus pass or food allowance, assistance from the careers team to help you move on after finishing your course etc.**
