

Curriculum Intent

The Geography department's aim is to create informed and active future citizens who understand how our lives are both shaped by and impact on the environments we inhabit. We want students to be curious about the ever changing world we live in and by studying current issues at local, national and international scales, we hope to encourage students to see the relevance and importance of the subject as a global citizen.

Students will extend their knowledge and understanding of physical and human features in the world by studying a broad range of interesting and stimulating topics. We will provide opportunities to use and develop geographical skills, such as data analysis, decision-making, mapping, the enquiry process and fieldwork skills, with the hope of producing interdisciplinary, geographical thinkers who are able to deal with 21st century issues.

Courses

GCSE Geography: EDEXCEL B
