## GCSE Fine Art, Textiles, Graphics and 3D Product Design

As the exam for these subjects is practical based, it is recommended that students are considering the following key points in order to achieve success:

#### AO1- Develop ideas through investigations, demonstrating critical understanding of sources.

- Artist and designer research, mood boards and sketchbook pages that evidences students' ideas and journey of their portfolio project.
- This can include written discussion as well as visuals.
- A wide variety of sources is advised including primary sources and visits where possible.

## AO2- Refine work by exploring ideas, selecting and experimenting with appropriate media, materials, techniques and processes.

- Students should include experimentation of different media and ways to draw and record.
- Students should carefully select what to explore depending on the techniques they are using in their portfolio.
- Sketchbook work and finished outcomes should evidence a wide variety of media, techniques and processes.

#### AO3-Record ideas, observations and insights relevant to intentions as work progresses.

- Drawing sheets and sketchbooks should evidence various forms of drawing and recording including models and maquettes.
- Photography can be included to support drawing and recording.
- Drawings should link to the overall starting point.
- Good quality imagery is important for students to draw from and this should never be from 'cartoon' style images.

## A04- Present a personal and meaningful response that realises intentions and demonstrates understanding of visual language.

- Portfolios of work should culminate in a final outcome(s) that demonstrate student's own ideas and creativity.
- Drawings, artist research and experimentation will link and build up to the final outcome creating a holistic approach to the project.
- Successful students will evidence a 'journey' from the start to end of the project that visually links.

## **Achieve Excellence**
